Fleecy Web Felt (22.5 x 40cm) -

PODOPRO <https://amzn.to/4IEDKcd>

Why We Recommend It: A versatile clinic favourite, soft, shapeable padding ideal for reducing pressure and friction on corns, calluses, or bony areas. Great for custom offloading.

Hapla 2mm Semi-Compressed Felt

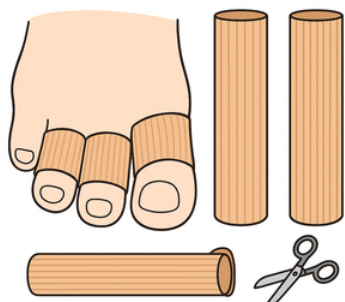

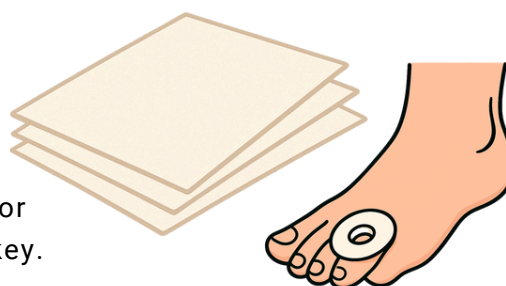

<https://amzn.to/44eJHqC>

Why We Recommend It: Low-profile, semi-compressed felt ideal for targeted offloading. A go-to option for cushioning sore areas without bulk—great under dressings or inside footwear. Easy to cut, shape, and stick.

Hapla 5mm Mixture Felt

<https://amzn.to/40wzZgM>

Why We Recommend Them: Deeper designs and adjustable fastenings make this a strong choice for diabetic foot care where pressure distribution is key.

Silicone Toe Sleeves Tube (2 Pack)

<https://amzn.to/4eD9KLL>

Why We Recommend Them: Soft, breathable toe sleeves that cushion and protect against pressure, friction, and minor trauma. Ideal for managing corns, blisters, hammer toes, overlapping toes, and post-injury discomfort. A discreet, reusable solution for everyday footwear comfort.

New Blacks Ingrown Nail File

<https://amzn.to/44tW4xB>

Why We Recommend It: A precise, rust-free tool ideal for gently easing and smoothing ingrown nail edges. Fine point tip allows for controlled work in tight nail grooves.
